Effingham Conservation Commission Work Session minutes, Aug. 26, 2019

The meeting was called to order at 6:35 p.m. James Rines of White Mountain Survey attended to present an application from the town for a culvert replacement.

Water Issues: James Rines presented an application by the town to replace a culvert on Green Mountain Road. Because the existing culvert needs to be replaced with one larger than the largest size exempted from review by the state, a dredge and fill permit is required. Rines presented the application so that the ECC could sign off on expedited review. He showed pictures and described the current culvert, and explained the plans for its replacement. After discussion, the members voted to sign the application.

Organizational Issues: The rest of the work session was devoted to finishing the revision and updating of the ECC Bylaws. Members went through paragraph by paragraph. It was about as exciting as it sounds. But if you're kind of an organizational nerd it was interesting. You get caught up in this stuff. You should try it.

The next regular meeting will be held Tuesday, Sept. 3, at the municipal offices, School Street, at 6:30 p.m.

Members present: Emelyn Albert (*Chair*); Harry Libby; Kamal Nath; Tim White (*Recording Secretary*); Jack Williams (*Vice Chair/Treasurer*) Absent: Virginia Wrabel(*alt.*); Bill Wrabel (*alt.*)

The work session adjourned at 8:17 p.m.

Respectfully submitted,
Tim White, Recording Secretary
